An algebraic number is a finite extension of \mathbb{Q} ; an algebraic number is an element of an algebraic number field. Algebraic number theory studies the arithmetic of algebraic

Algebraic Number Theory - James Milne

A unit quaternion is a quaternion of norm one. Dividing a non-zero quaternion q by its norm produces a unit quaternion U_q called the versor of q : $U_q = q/|q|$. Every quaternion has a polar decomposition $q = |q| U_q$. Using conjugation and the norm makes it possible to define the reciprocal of a non-zero quaternion. The product of a quaternion with its reciprocal should equal 1, and the ...

Empedocles of Acragas (c. 492-432 BC) Inventor of rhetoric and borderline charlatan. His arbitrary explanation of reality with 4 elements (Earth, Air, Fire and Water) and 2 forces (Love and Strife) dominated Western thought for over two millenia.

A paper about this work co-authored by Hall, Mikko J. Heule, Amherst postdoctoral research associate Michael Ray, Saugat Kandel '12 and Finnish graduate student Emmi Ruokokski was published today in ...

Physicists create synthetic magnetic monopole predicted

En mathématiques, le déterminant fut initialement introduit en algèbre, pour résoudre un système d'équations linéaires comportant autant d'équations que d'inconnues. Il se révèle un outil très puissant dans de nombreux domaines. Il intervient ainsi dans l'étude des endomorphismes, la recherche de leurs valeurs propres, les propriétés d'indépendance linéaire de certaines ...
