Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

The following statements can ensure economics as a positive science, such as; (i) Logically based: The ideas of economics are based on absolute logical clarifications and moreover, it develops relationship between cause and effect.

Nature of Economics: Economics as a Science and an Art

Studies that seek to forecast stock price movements often consider measures of market sentiment or stock return momentum as predictors. Recent research shows that a multiplicative combination of sentiment and momentum can help predict the return on the Standard & Poor's 500 stock index over the next month.
