Thermodynamics is the branch of physics that has to do with heat and temperature and their relation to energy and work. The behavior of these quantities is governed by the four laws of thermodynamics, irrespective of the composition or specific properties of the material or system in question. The laws of thermodynamics are explained in terms of microscopic constituents by statistical mechanics.

Special Issues. As of February 2015, Accounts of Chemical Research introduced a newly formatted special issue in which articles accepted for a special issue will appear online when ready in one of our regular monthly issues, while at the same time, appearing in the special issue itself being built online on its own dedicated webpage.

The Department of Mechanical and Aerospace Engineering of the Case School of Engineering offers programs leading to bachelors, masters, and doctoral degrees.

Department of Mechanical and Aerospace Engineering - Case

Note: The dual degree requires twenty hours of technical electives. The twenty hours consists of: nine hours of approved aerospace engineering technical electives, nine hours of approved mechanical engineering technical electives, and the final two hours can be either aerospace engineering or mechanical engineering approved technical electives.
