Introduction to Data Science provides a comprehensive overview of modern data science: the practice of obtaining, exploring, modeling, and interpreting data. While most only think of the "big subject," big data, there are many more fields and concepts to explore. Here Barton Poulson explores disciplines such as programming, statistics, mathematics, machine learning, data analysis ...

Data science interviews are the worst because data science is interdisciplinary: code for "you have to know everything about all the disciplines." Depending on the company and the team, your interview might look like a software developer's interview, or it might look a like a statistician's interview, and the bad news is that virtually none of the material overlaps.
