Finite-difference time-domain or Yee's method (named after the Chinese American applied mathematician Kane S. Yee, born 1934) is a numerical analysis technique used for modeling computational electrodynamics (finding approximate solutions to the associated system of differential equations). Since it is a time-domain method, FDTD solutions can cover a wide frequency range with a single ...

The electromagnetic wave equation is a second-order partial differential equation that describes the propagation of electromagnetic waves through a medium or in a vacuum. It is a three-dimensional form of the wave equation. The homogeneous form of the equation, written in terms of either the electric field  $E$  or the magnetic field  $B$ , takes the form:  $(\hat{\nabla} \cdot \hat{\nabla} - \hat{\mu} \hat{\epsilon}) = (\hat{\nabla} \cdot \hat{\nabla} - \hat{\mu} \hat{\epsilon}) =$

Journal of Computational Physics has an open access mirror journal Journal of Computational Physics: X, sharing the same aims and scope, editorial team, submission system and rigorous peer review. The Journal of Computational Physics focuses on the computational aspects of physical problems. The scope of the Journal is the presentation of new significantly improved techniques for the numerical ...
