The human brain is the central organ of the human nervous system, and with the spinal cord makes up the central nervous system. The brain consists of the cerebrum, the brainstem and the cerebellum. It controls most of the activities of the body, processing, integrating, and coordinating the information it receives from the sense organs, and making decisions as to the instructions sent to the ...

We are working to address the technical and scientific barriers of marine aquaculture and to provide science information for management in a number of ways, including through in-house research at NOAA, grants and cooperative agreements with Sea Grant and other stakeholders, and by coordinating research with other

federal agencies.
