Nonlinear Analysis | ScienceDirect.com

The Journal of Mathematical Analysis and Applications presents papers that treat mathematical analysis and its numerous applications. The journal emphasizes articles devoted to the mathematical treatment of questions arising in physics, chemistry, biology, and engineering, particularly those that stress analytical aspects and novel problems and their solutions.

Definition. Given two manifolds M and N , a differentiable map $f : M \rightarrow N$ is called a diffeomorphism if it is a bijection and its inverse $f^{-1} : N \rightarrow M$ is differentiable as well. If these functions are r times continuously differentiable, f is called a C^r -diffeomorphism. Two manifolds M and N are diffeomorphic (symbol usually being $M \cong N$) if there is a diffeomorphism f from M to N .

Diffeomorphism - Wikipedia

Centered around dynamics, DCDS-B is an interdisciplinary journal focusing on the interactions between mathematical modeling, analysis and scientific computations.

American Institute of Mathematical Sciences

Abstract: In this paper, we summarize some of the recent developments in the area of fractional equations with focus on the ideas and direct methods on fractional non-local operators.

American Institute of Mathematical Sciences

In mathematics, a metric or distance function is a function that defines a distance between each pair of elements of a set. A set with a metric is called a metric space. A metric induces a topology on a set, but not all topologies can be generated by a metric. A topological space whose topology can be described by a metric is called metrizable. An important source of metrics in differential ...

The Classical Spin-Rotation Coupling and the Kinematic Origin of Inertia. Authors: Louai Hassan Elzein Bashier Comments: 30 Pages. This paper is prepared to show that a rigid body which accelerates curvilinearly from its center of mass relative to a fixed point must simultaneously accelerate angularly relative to its center of mass.
