Stay Updated with the Parallel Universe Magazine. Intel® Rendering Framework Using Software Defined Visualization. The open source community initiative on software defined visualization (SDVis) continues to demonstrate that the CPU is better for large-scale rendering than GPU-based solutions, which suffer from memory limitations and high cost.

Intel® Software Development Tools-Homepage

Scrum is an agile framework for managing knowledge work, with an emphasis on software development. It is designed for teams of three to nine members, who break their work into actions that can be completed within timeboxed iterations, called "sprints", no longer than one month and most commonly two weeks, then track progress and re-plan in 15-minute stand-up meetings, called daily scrums.

VERIFICATION vs VALIDATION are hugely confused and debated terms in the software testing world. You will encounter (or have encountered) all kinds of usage and interpretations of these terms, and it is our humble attempt here to distinguish between them as clearly as possible.

Verification vs Validation - Software Testing Fundamentals

Figure 1: Quality is a differentiator in all modes of software development. In the long run, an organization's specific definition of quality may be less important than the fact that it has established one.

The business value of software quality - IBM

Driven by Metrics Abstract: Performance metrics can have both good and bad impacts on an organization. In order to maximize the good while minimizing potential damage, the organization must make sure they have the right metrics, use them appropriately, and revise them occasionally to account for changes that affect their usefulness.
