Tektronix MDO3104 Mixed Domain Oscilloscope (4) 1 GHz Analog Channels, (1) 1 GHz Spectrum Analyzer Input Today's integrated designs need an oscilloscope that is just as integrated - such as the MDO3000 Mixed Domain Oscilloscope (MDO) Series.

Amazon.com: Tektronix MDO3104 1 GHz Mixed Domain

The Spectrum Shield enables your Arduino with the capability of splitting a stereo audio input into 7-bands per channel. You can then read the amplitude of each channel using the ADC on your Arduino allowing you to control everything from LEDs to motors, pumps to relays, or even fire, all with sound.

Easy to use, powerful, compact and robust " Spectrum Two is the FT-IR spectrometer of choice for everyone, everywhere. With fully integrated, robust universal sampling for trouble-free measurements and portability options, Spectrum Two is ideal for use in both laboratory and remote testing environments.

The IVIS Å® Spectrum in vivo imaging system combines 2D optical and 3D optical tomography in one platform. The system uses leading optical technology for preclinical imaging research and development ideal for non-invasive longitudinal monitoring of disease progression, cell trafficking and gene expression patterns in living animals.

The power spectrum () of a time series describes the distribution of power into frequency components composing that signal. According to Fourier analysis, any physical signal can be decomposed into a number of discrete frequencies, or a spectrum of frequencies over a continuous range. The statistical average of a certain signal or sort of signal (including noise) as analyzed in terms of its ...

In mathematics, Fourier analysis (/ ˈfɔːr i eɪə, -i ˈeɪr /) is the study of the way general functions may be represented or approximated by sums of simpler trigonometric functions. Fourier analysis grew from the study of Fourier series, and is named after Joseph Fourier, who showed that representing a function as a sum of trigonometric functions greatly simplifies the study of heat transfer.

Micro908 "Antenna Analyst AA-908" Several years ago, N2APB and N2CX embarked on a journey to develop a low-cost antenna analyzer that would sweep the ham bands with a micro power transmitter and measure the resultant SWR of an antenna system. We presented the original design of the Analyzer at various QRP forums circa 1998-2000 and evolved the hardware platform several more times in the ...
