Algorithmic trading is a method of executing a large order (too large to fill all at once) using automated pre-programmed trading instructions accounting for variables such as time, price, and volume to send small slices of the order (child orders) out to the market over time. They were developed so that traders do not need to constantly watch a stock and repeatedly send those slices out manually.

Key Points About Regulation SHO I. Short Sales A. What is a short sale? A short sale is generally the sale of a stock you do not own (or that you will borrow for delivery). Short sellers believe the price of the stock will fall, or are seeking to hedge against potential price volatility in securities that they own.
