This review is an update of 'Topical capsaicin (high concentration) for chronic neuropathic pain in adults' last updated in Issue 2, 2013. Topical creams with capsaicin are used to treat peripheral neuropathic pain. Following application to the skin, capsaicin causes enhanced sensitivity, followed by a period with reduced sensitivity and, after repeated applications, persistent desensitisation.

Capsaicin applied to the skin for chronic neuropathic pain

Few people are familiar with the term nightshades, and many will be surprised to learn that consuming foods from this plant group may be contributing to their pain and inflammation.
