This disambiguation page lists articles associated with the title STL. If an internal link led you here, you may wish to change the link to point directly to the intended article.

### **STL - Wikipedia**

The Standard Template Library (STL) is a software library for the C++ programming language that influenced many parts of the C++ Standard Library. It provides four components called algorithms, containers, functions, and iterators. The STL provides a set of common classes for C++, such as containers and associative arrays, that can be used with any built-in type and with any user-defined type ...
