4 What is Mapping? Mapping is a tool for seeing relationships between different aspects of the institution based on learning outcomes as well as documenting where learning is demonstrated and how.

Mapping Learning: A Toolkit

John Hattie developed a way of synthesizing various influences in different meta-analyses according to their effect size (Cohen's d). In his ground-breaking study "Visible Learning" he ranked 138 influences that are related to learning outcomes from very positive effects to very negative effects. Hattie found that the average effect size of all the interventions he studied was 0.40.
