Products. At Brooks we believe every horse has unique requirements. Each Brooks ration is formulated to provide the right balance of energy, protein, minerals and vitamins to bring out the best in your horse.

Horse Feed and Nutritional Supplements - Brooks Feeds

Introduction. Most fish farmers and ornamental fish hobbyists buy the bulk of their feed from commercial manufacturers. However, small quantities of specialized feeds are often needed for experimental purposes, feeding difficult-to-maintain aquarium fishes, larval or small juvenile fishes, brood fish conditioning, or administering medication to sick fish.

Fodder in the form of sprouted cereal grains such as barley, and legumes can be grown in small and large quantities. Hydroponic systems can grow up to tons of sprouts to each day; year round in a carefully controlled environment.. Sprouted grains can increase the nutritional value of the grain compared with feeding the ungerminated grain to stock. In addition, they use less water than ...

Fodder - Wikipedia

Parenteral nutrition (PN) is the feeding of specialist nutritional products to a person intravenously, bypassing the usual process of eating and digestion. The products are made by specialist pharmaceutical compounding companies and is considered to be the highest risk pharmaceutical preparation available as the products cannot undergo any form of terminal sterilization.
