Usability is the ease of use and learnability of a human-made object such as a tool or device. In software engineering, usability is the degree to which a software can be used by specified consumers to achieve quantified objectives with effectiveness, efficiency, and satisfaction in a quantified context of use.. The object of use can be a software application, website, book, tool, machine ...

Usability - Wikipedia

Usability testing is a technique used in user-centered interaction design to evaluate a product by testing it on users. This can be seen as an irreplaceable usability practice, since it gives direct input on how real users use the system. This is in contrast with usability inspection methods where experts use different methods to evaluate a user interface without involving users.

When I wrote Don't Make Me Think, my intent was to help people learn to think like a usability expert: to ask the same questions that I have in mind when I'm trying to make something more usable.. I believed that with a little bit of instruction most people could do a lot of what I do themselves, since much of it just seems like common sense once you hear it explained.
